

A composable cloud banking platform for modern core and payments solutions

We help 260+ banks, building societies, lenders and fintechs across 65 countries make more possible, enabling easier access to financial services for everyone. Our customers can launch and scale virtually any type of financial offering, faster than ever before.

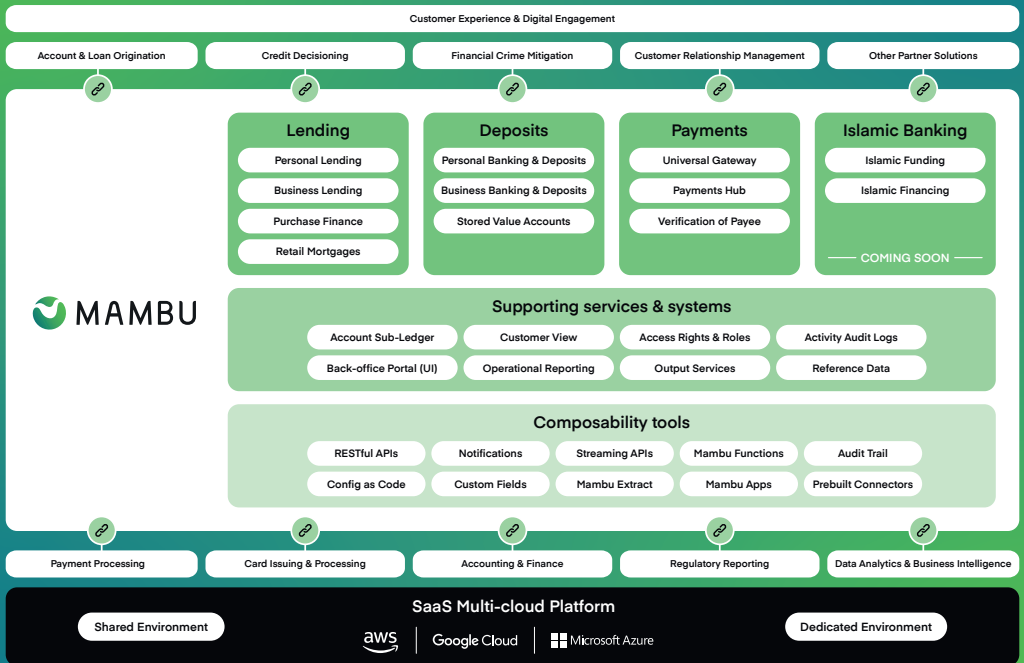

Step into the future with our cloud banking platform

- 1 Goodbye to legacy**
With Mambu's cloud banking platform you launch faster and scale smarter.
- 2 Embrace composability**
Pre-configured components and a large partner ecosystem provides enhanced ability to innovate, reach, scale and accelerate speed to market.
- 3 Scale deposits, lending, and payments**
Enter new markets, attract new customers and deliver on your growth plans.
- 4 Cut costs, not service**
Introduce automation and a transparent consumption model eliminating expensive customisation and maintenance costs.
- 5 Securely run in the cloud**
Your choice of leading cloud service providers to ensure maximum performance, security, scalability and reliability.
- 6 Innovate, iterate, future-proof**
Continuously deliver the experience your members need, today and tomorrow.

The trailblazers changing financial services

Composable technology foundation

Flexible & agile banking engines born in the cloud

As the first true SaaS banking platform provider, Mambu was born in the cloud and enables product integrations with greater speed and ease.

Lending

Personal lending

Interest-bearing secured or unsecured personal loans for individual use.

Business lending

Interest-bearing secured or unsecured loans granted to SMEs or corporates.

Purchase financing

Consumer finance loans offered by e-commerce providers to customers, such as POS finance or BNPL.

Mortgages

Collateral-based real estate loans for individuals (non-commercial purposes).

Deposits

Personal deposits

Savings accounts, savings plans and term deposits for individuals.

Business deposits

Savings accounts, savings plans and term deposits for SMEs or corporates.

Stored value accounts

Transactional accounts which support digital wallets, pre-paid or stored value cards.

Daily banking

Transactional accounts with full retail banking functionality connected to debit cards for personal use.

Payments

Universal gateway

Managed bank and scheme connectivity and compliance.

Payments hub

Payment processing, liquidity and reconciliation automation.

Verification of Payee

Fully managed cloud solution for VOP compliance.
